PROFESSIONAL SUMMARY

Cybersecurity professional and M.S. Information Technology & Management candidate specializing in cybersecurity, with hands-on Security Operations Center (SOC) experience investigating phishing, suspicious sign-ins, endpoint detections, identity threats, and potentially malicious activity. Experienced with Microsoft Defender XDR, Microsoft Entra ID, Red Canary, KQL, Azure, and endpoint security workflows. Background includes incident triage, threat investigation, identity and access analysis, endpoint remediation, and cloud technologies. Seeking to continue developing in Security Analyst, SOC Analyst, and incident response roles.

CYBERSECURITY EXPERIENCE

Libra Solutions Group — Security Analyst Intern

2026 –

Present

- Investigate and triage security alerts involving phishing, suspicious authentication activity, endpoint detections, credential-access behavior, potentially unwanted applications, and other security events across enterprise environments.
- Perform investigations using Microsoft Defender XDR, Defender for Office 365, Red Canary, Microsoft Entra ID, Azure, Intune, endpoint timelines, audit logs, and advanced hunting data.
- Analyze sign-in activity, authentication patterns, source IP information, MFA events, account activity, and identity-related telemetry to distinguish legitimate behavior from potential account compromise.
- Use Kusto Query Language (KQL) and Microsoft Defender Advanced Hunting to investigate endpoint, identity, email, and security telemetry and correlate activity across multiple data sources.
- Support incident containment and remediation through session revocation, password-reset coordination, malicious-email removal, endpoint isolation, security scanning, and validation of remediation status when warranted.
- Document investigation findings, remediation actions, supporting evidence, and closure rationale and collaborate with IT/security personnel to validate authorized administrative activity and security tooling.

TECHNICAL SKILLS

Security Operations: Alert Triage, Incident Investigation, Phishing Analysis, Endpoint Security, Identity Security, Incident Response, Threat Investigation, Security Event Analysis

Security Platforms: Microsoft Defender XDR, Microsoft Defender for Office 365, Red Canary, Microsoft Entra ID, Microsoft Intune

Investigation & Administration: KQL, Defender Advanced Hunting, Entra Sign-in Logs, Audit Logs, Endpoint Timelines, Azure Portal, Atera

Cloud & Infrastructure: Microsoft Azure, AWS, Google Cloud Platform (GCP), Linux, SSH, IAM, EC2, S3

Programming & Data: Python, pandas, SQL, PostgreSQL, JavaScript, Git/GitHub, Excel, Data Visualization

EDUCATION

University of Texas at Dallas — M.S., Information Technology & Management (Cybersecurity)

Expected May 2027

GPA: 3.6 | Relevant studies: Cybersecurity, Cloud Computing, Database Systems, Python Programming, Security Analytics

University of North Texas — Bachelor's Degree, Biology; Minor in Chemistry

May

2024

GPA: 3.5

SELECTED TECHNICAL PROJECTS

Cloud Infrastructure Deployment | AWS & Google Cloud Platform

- Deployed and configured cloud infrastructure using virtual machines, firewall rules, SSH access controls, IAM permissions, and cloud networking in a six-person team environment.

Cybersecurity Investigation Portfolio | Defender XDR, Entra ID, KQL

- Developed anonymized security investigation case studies covering phishing, suspicious sign-ins, endpoint detections, identity threats, remediation decisions, and incident outcomes; published at radmantah.com.

Python Data Analysis | Python, pandas, Matplotlib

- Analyzed structured datasets with Python and pandas, applied object-oriented programming, created multiple visualizations, and documented technical findings.

Relational Database Design | PostgreSQL, SQL

- Designed normalized relational schemas using primary/foreign keys, constraints, indexes, entity relationships, and SQL DDL.

ADDITIONAL PROFESSIONAL EXPERIENCE

Walmart — Pharmacy Technician

2021 –

Present

- Work in a high-volume regulated healthcare environment requiring accuracy, confidentiality, documentation, and coordination with patients, pharmacists, providers, and insurers.

Walgreens — Pharmacy Technician

Previous Experience

- Supported prescription processing, inventory operations, insurance billing, and customer service while maintaining HIPAA and patient-confidentiality requirements.

PROFESSIONAL DEVELOPMENT

- Hands-on Security Operations Center experience with enterprise security and identity platforms.
- AWS and Google Cloud Platform infrastructure deployment through graduate coursework and technical projects.
- Ongoing graduate specialization in cybersecurity through the M.S. Information Technology & Management program.
